

Hotel Swiss Chalet

If you booked our [Swiss Chalet Airport pick-up service](#) - then the below instructions will help you to make your arrival at the airport and your meeting the [Swiss Chalet](#) pick-up service driver at the Airport easier. Please read carefully or better print out these instructions for your convenience.

Dear Guest - Welcome in the Philippines

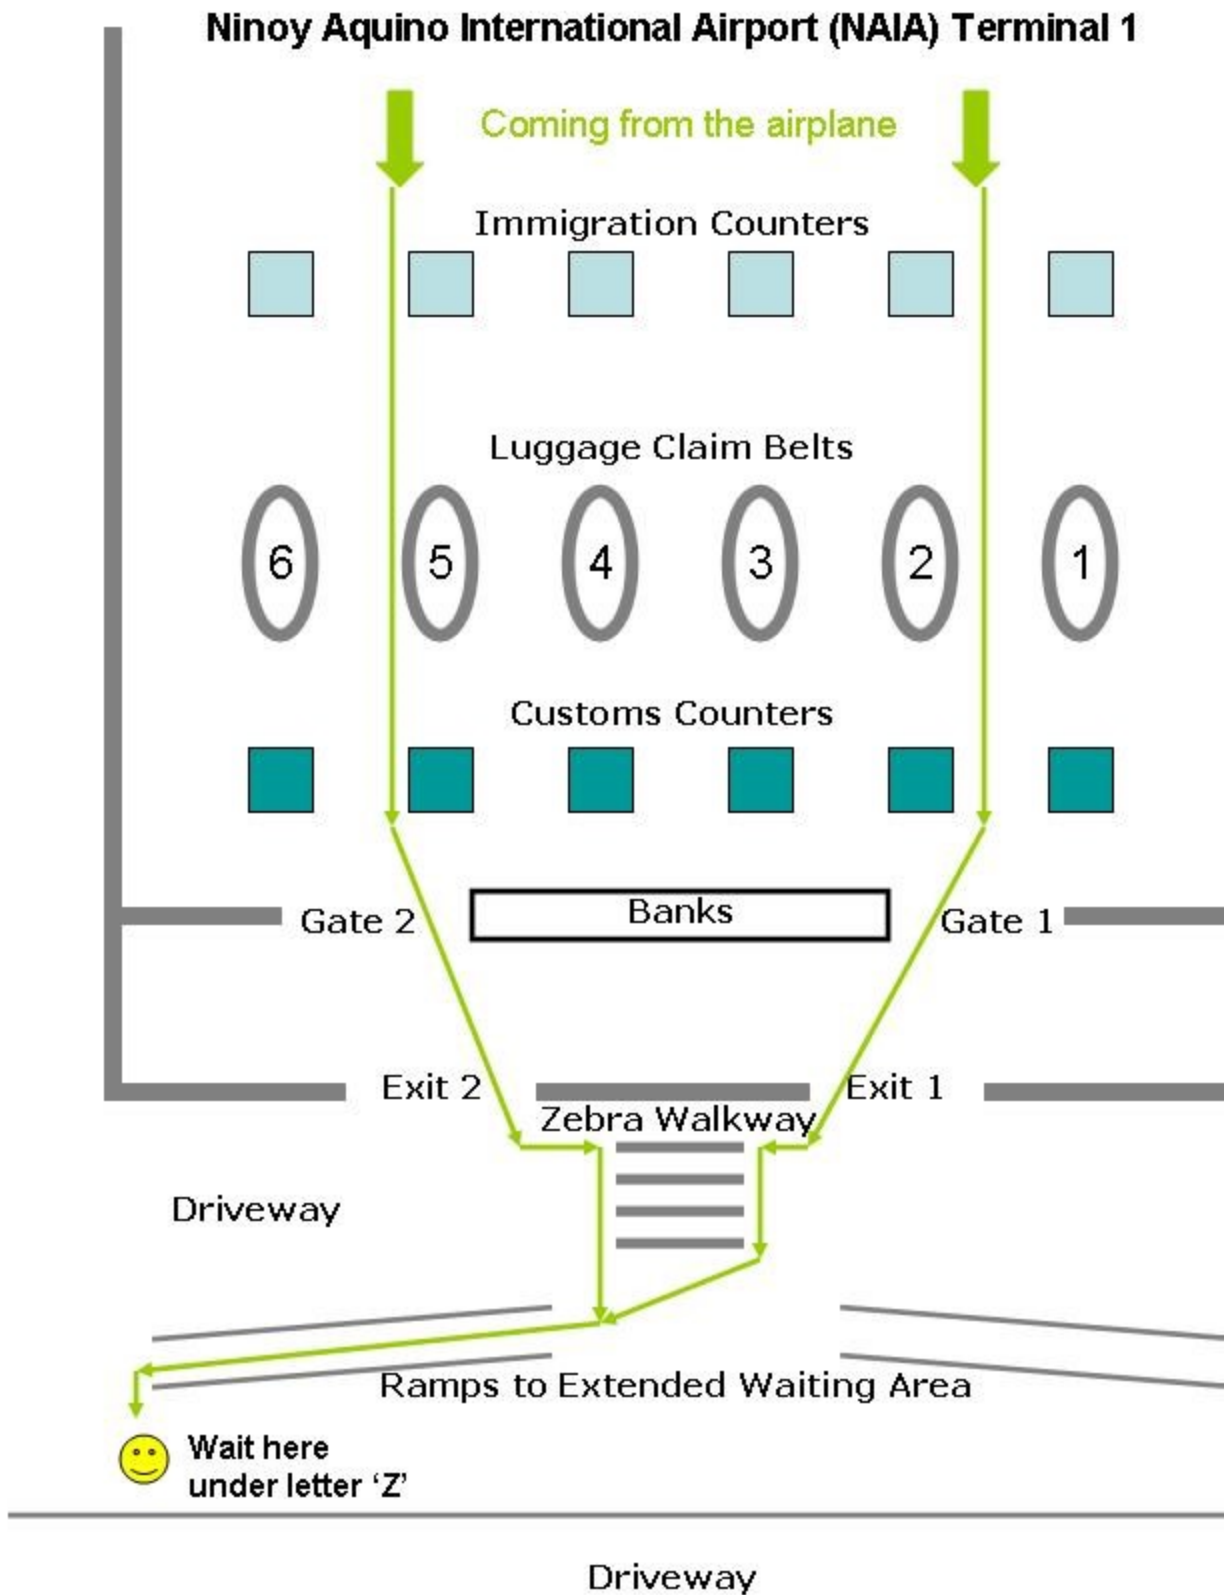

We hope you had a comfortable Flight.

We have arranged your transport from Manila Airport to Angeles City and you will find/locate your Transport/Driver as follow:

1. Arrival at Terminal 1 (all flights except Philippine Airlines).
2. After leaving the plan you will first pass through immigration.
3. Then you will proceed directly to the luggage claim area.
4. Once you claimed your luggage, go straight ahead for customs clearance. There you will have to present your immigration card, that has been stamped by the immigration officer.
5. Go straight ahead, passing through the sliding doors. Now you are in the arrival hall, where you will probably be assaulted by many Hotel Drivers. Tell them that you have a transport waiting for you and just ignore them.
6. Keep going straight ahead leaving the Arrival Hall by passing through the sliding doors.
7. Outside the Terminal/Arrival Hall look for the zebra crossing.
8. Look across the street, where you will see a sign above the sidewalk that says "**ARRIVAL EXTENSION**".
9. Cross the street to get to the "**ARRIVAL EXTENSION**" and go down the ramp to your RIGHT to get to the main reception area, which is one floor down at ground level.
10. Stop under the letter "**Z**" and look across the street. Your driver is waiting behind the fence, holding a Swiss Chalet sign, wearing a Swiss Chalet T-shirt or Polo shirt and Baseball cap.
11. Walk across the street once you locate him.

It's important that you follow the above instructions. Should you have any doubts, please do not hesitate to contact us.

Below schematic drawing hopefully clears up any doubts:

When crossing the road toward the ramp, you should see below:
